Which Is the More Important In Your Home—Your Piano or Your Refrigerator?

You would not think of buying a piano solely for its paint and varnish. You buy it mainly for its tone—its efficiency. There's more difference in Refrigerators than in pianos, and your Refrigerator is vastly more important. The very health of your family may depend upon it. When you purchase a

BOHN SYPHON REFRIGERATOR

you are placing in your home a scientifically constructed, sanitary Refrigerator which will serve you and your family efficiently for years. It will keep your food cold, clean, dry and pure; it will prevent mingling of odors—everything comes fresh and sweet from a Bohn Refrigerator. And—very important—it will use less ice than any other Refrigerator ever built.

Here are a few points of Bohn excellence: "Syphon System" of constantly circulating cold, dry air; "Flaxinum," the world's best heat-resisting insulation, in walls and doors; fused-steel, one-piece, round-cornered porcelain lining—like your bath tub; front drain—instantly removed for cleansing; magnificent oak exterior cabinet work, or white porcelain or robin-egg blue porcelain exterior; massive, solid brass, nickel-plated hardware.

You need a good Refrigerator in winter even more than in summer—avoid the dust and impurities of the outside air. The air in a Bohn is practically filtered. Some fine models are now marked at low prices. Refrigerators from \$25 up. Later delivery if desired. If you cannot call, write or phone for illustrated catalog.
